

Sporty Summer DXB

Sports Facility Management ERP — Odoo 19

Technical Advanced Bootcamp case study · Summer 2026

Odoo 19.0 · Python 3.12 · 20 automated tests · CI passing · LGPL-3.0

Case study, requirement by requirement

Requirement (from the brief)	How it's implemented
Centralized court availability & bookings	sport.court + sport.booking with a calendar schedule view
Prevent double-booked courts	@api.constrains rejects overlapping live bookings on a court
Enforce participant limits per sport	sport.type.max_participants enforced per session
Payments settled before participation	draft → confirmed → paid → played; play blocked until paid
First-come-first-served class registration	coaching classes + registrations with FCFS capacity guard
Loyalty for frequent visitors	res.partner computes visits → automatic 10% loyalty discount
Track equipment loaned to customers	sport.equipment (live stock) + sport.equipment.loan
Record losses & damages	loan states on-loan / returned / lost / damaged + penalty charge
Real-time visibility & analytics	Graph + Pivot (revenue by sport, utilisation by court/status)
Roles & access control	Staff (reception) vs Manager groups + access rules
Documentation	QWeb PDF booking confirmation + seeded demo data

What's inside

7 models — sport.type, sport.court, sport.booking, sport.coaching.class, sport.class.registration, sport.equipment, sport.equipment.loan, plus a res.partner extension for the coach flag and loyalty.

Views — calendar, kanban, list, form, search, graph and pivot.

Logic — declarative SQL constraints, computed/related fields, onchange, action buttons, a state machine, sequences, chatter & activity tracking.

20 TransactionCase tests — double-booking, participant limits, payment gating, first-come-first-served seats, over-loan prevention and the loyalty discount.

Engineering — Staff/Manager security, demo data, a QWeb PDF confirmation, and a GitHub Actions CI pipeline.

Code & tests: github.com/Kazemkhani/real-estate-odoo — Pull request #2 (CI green). Built on Odoo 19 for the Technical Advanced Bootcamp.
